## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 8-10, 12 and 13 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or suggest a method of preparing a ceramic honeycomb body that has outer peripheral portions of lattice walls that contain a smaller porosity denser than the inner peripheral portion of the lattice walls, characterized in that a melting-point lowering component is applied on at least a portion of the outer peripheral portion of the lattice walls, and then the body is heat-treated to form the denser portion. The most relevant prior art of record is U.S. Patent No. 6,242,072 (Ueda et al.), which discloses a method of densifying areas of honeycomb bodies by applying a melting-point lowering component. In the reference, the desired portions are immersed in the solution. This would create a honeycomb having denser portions over the entire cross-section of lattice walls.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
